## PRODUCTS

TRAPOROL products are used with the implementing of a multiplicity of materials-handling and storage systems. The specifications of materials-handling components are determined by the operating conditions.

Since 2000 TRAPOROL offers high-quality products and innovative new developments in the range of materials-handling components.

Our attention is especially directed to the quality of our products and the building of know-how, this is reflected in our corporate philosophy as well.

## COMPANY

The broadly varied TRAPOROL assortment keeps ready custom-made or standardized solutions for each intended purpose.

Modular conveyors, accessories as well as extension components for complete materials-handling installations are adapted in size, material or surface texture to the respective requirements of the industry and the customer.

Most modern manufacturing plants and production methods ensure thereby the problem-free, fast conversion of transportation problems to practicable solutions.

Our experience as well as the unflagging commitment of our employees is reflected in the quality of our products. Only if the customer is satisfied with our product, we are satisfied as well. The satisfied customer and the smooth operation of our conveying elements and components are therefore the guiding principles of our activities.

## QUALITY

Therefore we do everything.

To satisfy this high requirement today as well as in the future TRAPOROL GmbH is active in many ranges. Co-operation with universities and research institutes, the permanent further training of our employees, the use of state of the art electronic data processing tools (such as CAD systems, simulation programs) and, last but not least, the continuous improvement process of our products and processes serve this goal.

The all-side roller, a versatile usable module for low-friction distributing, transporting, turning and shuffling-off.

The all-side roller is a self-development, one of many examples of creative know-how for the extension of the broadly strewn product range.

No borders are set to our creative know-how. You define your task - our innovative team supplies the solution.

Permanent product improvement stands for holistic solutions in materials-handling technology.

This means for us: Innovative materials-handling technology, from the idea to the production.

## KNOW - HOW

The broadly varied TRAPOROL assortment contains apart from various roles and modules also the appropriate accessories.

There to belong conveying rollers, roller fitting strips, roller tracks, guide disks, support struts and guides.

The maximum possible benefit to the customer always remains at the forefront of our thinking and our actions.

A close collaboration with the work environment of our customers ensures our understanding for their needs.

We focus on expanding our core competencies and strengths instead of wasting our time on a wide range of activities.

## PHILOSOPHY

Whatever we do, we do it consistently.

We are not satisfied with averages. Only highest demands of the quality of workmanship and the responsibility of each and every employee, supplier and service personnel secures required peak performance for maximizing the benefit.

We want every customer's contact with us to be a positive memory.

Every components and elements for conveyor technology installations operate exactly as demanded by the customer.
